SUMMARY

Frontend Engineer specializing in React and TypeScript for AI-native B2B SaaS and high-traffic Web3 products. Built an AI-native underwriting workstation from zero to beta at a startup later selected for YC S26; previously shipped Web3 trading and NFT tools processing \$1M+ transaction volume and 100K+ on-chain claims. Focused on stable, maintainable code and shipping quickly in ambiguous, 0-to-1 environments.

WORK EXPERIENCE

Frontend Engineer – Qlo (selected for YC S26) Jan 2026 – May 2026

- Co-developed an AI-native underwriting workstation from zero to beta, centralizing carrier workflows to replace fragmented legacy tools and spreadsheets; the product was later selected for Y Combinator's S26 batch.
- Built review UIs for AI-driven document extraction pipelines, enabling underwriters to verify and correct auto-generated submissions quickly and confidently.
- Built a schema-driven form and premium calculation engine with React Hook Form and Zod, handling deeply nested data structures with synchronized multi-step workflows.

Frontend Engineer – Lootex July 2022 – Dec 2025

- Developed an NFT trading platform handling \$1M+ in transaction volume, using BigNumber precision and robust error handling to ensure accurate wallet interactions.
- Built a no-code NFT claim tool that processed 100K+ claims, optimizing smart-contract integration to stay fast and stable during network congestion.
- Led frontend for Web3 game FizzPop, optimizing rendering performance for a smooth gameplay experience; the game reached 39% Day-1 retention (3–4x category average).
- Implemented a Tailwind CSS design system with Storybook, standardizing accessible UI components and shortening interface development cycles across the team.

SKILLS

Frontend Core: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS

Forms & State: TanStack Query (React Query), React Hook Form, Zod

Web3 Integration: Viem, Wagmi

Tools: Git, Figma, Storybook

Languages: Chinese (native), English

EDUCATION & TRAINING

Master of Public Relations & Advertising – UNSW Sydney, Australia 2015

Frontend Engineer Program – AppWorks School Jan 2022 – June 2022

- Completed 1,000+ hours of immersive full-time training (<10% acceptance rate); independently built and launched a personal project in 5 weeks using Scrum.
